

IN THE CLAIMS:

The status of each claim that has been introduced in the above-referenced application is identified in the ensuing listing of the claims. This listing of the claims replaces all previously submitted claims listings.

1. (Currently amended) A composition for treating a cardiovascular disordersdisorder, comprising:
an inflammation-reducing component for decreasing an amount of inflammation in blood vessels of a subject, comprising transfer factor specific for at least one pathogen associated with a treated cardiovascular disorder or for at least one antigen of at least one pathogen associated with the treated cardiovascular disorder; and
at least one blood flow-enhancing component.

2. (Canceled)

3. (Canceled)

4. (Currently amended) The composition of claim 21, wherein said transfer factor comprises nonmammalian transfer factor.

5. (Original) The composition of claim 4, wherein said nonmammalian transfer factor comprises avian transfer factor.

6. (Original) The composition of claim 5, wherein said avian transfer factor comprises at least a part of an egg extract.

7. (Currently amended) The composition of claim 21, wherein said transfer factor comprises mammalian transfer factor.

8. (Original) The composition of claim 7, wherein said mammalian transfer factor comprises at least a part of a colostrum extract.

9. (Previously presented) The composition of claim 1, wherein said at least one inflammation-reducing component is specific for at least one of HSV-I, HSV-II, *Chlamydia pneumoniae*, cytomegalovirus, and *Helicobacter pylori*.

10. (Original) The composition of claim 1, further comprising:
an LDL receptor-binding component.

11. (Original) The composition of claim 10, wherein said LDL receptor-binding component comprises lysine or a lysine salt.

12. (Previously presented) The composition of claim 1, wherein said at least one blood flow-enhancing component comprises at least one of arginine and nicotinamide.

13. (Previously presented) The composition of claim 1, further comprising:
at least one antioxidant.

14. (Original) The composition of claim 13, wherein said at least one antioxidant comprises at least one hydrophobic antioxidant.

15. (Original) The composition of claim 14, wherein said at least one hydrophobic antioxidant comprises at least one of beta-carotene, vitamin A, and vitamin E.

16. (Original) The composition of claim 13, wherein said at least one antioxidant comprises Coenzyme Q₁₀.

17. (Original) The composition of claim 1, further comprising a cholesterol-reducing element.

18. (Original) The composition of claim 1, further comprising a fat oxidation prevention element.

19-49 (Canceled)

50. (Currently amended) A composition for treating a cardiovascular disordersdisorder, comprising:
a pathogen-reducing component for decreasing a number of pathogens in blood vessels of a subject, comprising at least one type of transfer factor specific for at least one pathogen associated with a treated cardiovascular disorder or for at least one antigen of at least one pathogen associated with the treated cardiovascular disorder; and
at least one blood flow-enhancing component.

51. (Canceled)

52. (Canceled)

53. (Currently amended) The composition of claim ~~51~~50, wherein said transfer factor comprises nonmammalian transfer factor.

54. (Original) The composition of claim 53, wherein said nonmammalian transfer factor comprises avian transfer factor.

55. (Original) The composition of claim 54, wherein said avian transfer factor comprises at least a part of an egg extract.

56. (Currently amended) The composition of claim ~~51~~50, wherein said transfer factor comprises mammalian transfer factor.

57. (Original) The composition of claim 56, wherein said mammalian transfer factor comprises at least a part of a colostrum extract.

58. (Previously presented) The composition of claim 50, wherein said pathogen-reducing component is specific for at least one of HSV-I, HSV-II, *Chlamydia pneumoniae*, cytomegalovirus, and *Helicobacter pylori*.

59. (Original) The composition of claim 50, further comprising:
an LDL receptor-binding component.

60. (Original) The composition of claim 59, wherein said LDL receptor-binding component comprises lysine or a lysine salt.

61. (Previously presented) The composition of claim 50, wherein said at least one blood flow-enhancing component comprises at least one of arginine and nicotinamide.

62. (Original) The composition of claim 50, further comprising:
at least one antioxidant.

63. (Original) The composition of claim 62, wherein said at least one antioxidant comprises at least one hydrophobic antioxidant.

64. (Original) The composition of claim 63, wherein said at least one hydrophobic antioxidant comprises at least one of beta-carotene, vitamin A, and vitamin E.

65. (Original) The composition of claim 62, wherein said at least one antioxidant comprises Coenzyme Q₁₀.

66. (Original) The composition of claim 50, further comprising a cholesterol-reducing element.

67. (Original) The composition of claim 50, further comprising a fat oxidation prevention element.

68. (New) A composition, comprising:
a preparation including transfer factor;
Vitamin C;
niacinamide;
an arginine; and
a lysine.

69. (New) The composition of claim 68, wherein:
the arginine comprises magnesium arginate; and
the lysine comprises magnesium lysinate.

70. (New) The composition of claim 68, comprising the preparation including transfer factor and the Vitamin C in substantially equal amounts.

71. (New) The composition of claim 68, wherein the transfer factor is specific for at least one pathogen associated with a cardiovascular disorder or at least one antigen of at least one pathogen associated with the cardiovascular disorder.

72. (New) A composition, comprising:
substantially a first amount of a preparation including transfer factor; and
substantially the first amount of Vitamin C.

73. (New) The composition of claim 72, wherein the transfer factor is specific for at least one pathogen associated with a cardiovascular disorder or at least one antigen of at least one pathogen associated with the cardiovascular disorder.

74. (New) The composition of claim 73, further comprising at least one LDL receptor-binding element, at least one blood flow-enhancing element, and at least one blood cholesterol reducer.

75. (New) The composition of claim 74, wherein the at least one LDL receptor-binding element comprises a lysine and the at least one blood flow-enhancing element comprises an arginine.

76. (New) The composition of claim 75, wherein the at least one blood cholesterol reducer comprises niacinamide.

77. (New) The composition of claim 75, wherein the lysine comprises magnesium lysinate and the arginine comprises magnesium arginate.

78. (New) The composition of claim 77, wherein the at least one blood cholesterol reducer comprises niacinamide.
